PAIN MANAGEMENT USING ADVANCED TECHNOLOGY FROM EUROPE

Papimi Therapy

BOOK IN FOR 6 SESSIONS AND GET THE 6TH FOR FREE*

Pulse emitting magnetic field therapy {PEMF} is widely recognised throughout Europe for its outstanding results with pain relief, and is rapidly gaining recognition here in Australia.

The PEMF (papimi) device, creates an electromagnetic field, which is directed to the troubled area, stimulating the healing process. Extensive research shows that musculoskeletal pain, pain from tissue trauma, arthritis, inflammation and injuries, is significantly relieved by PEMF therapy.

Medical literature over the past few decades offers ample proof that the induction formed by electromagnetic fields is remarkably effective in healing, regenerating and revitalising cells damaged by trauma.

Treatment with PEMF is pleasant, painless and non-invasive.

Cairns Pain Help Centre invites you to take a more holistic approach to your pain management regime.

Call Patrick Wall on 4051 4551 to find out what PEMF therapy can do for you.

**Please ask about further discounts for longer treatment plans.*
